

Congratulations on the purchase of your National Tiles Floor. To keep your new floor looking great for years to come follow these simple care & maintenance guidelines

Hybrid Flooring Cleaning & Care

Cleaning and caring for your National Tiles Hybrid Floor is easy. Simply follow these tips and your floor will stay looking great for years.

Do

- ✓ Immediately clean spills or stains with a dry, clean cloth. National Tiles Hybrid flooring is water proof, however certain substances may cause indelible staining if left to dry.
- ✓ Vacuum, sweep or dust mop the floor to remove any grit or loose dirt which could scratch the floor.
- ✓ Mop the floor using a slightly damp mop and a soap-free, non-abrasive cleaner, removing any marks, footprints or dirt.
- ✓ Stubborn stains and scuff may be removed using a diluted rubbing alcohol.
- ✓ Use non silicon/rubber floor protection under all furniture legs and other heavy objects.
- ✓ The use of exterior doormats at entrances will help protect your floor against excessive dirt, sand, grit, moisture and other substances from shoes.
- ✓ Protect floors from extreme changes in temperature. (Below 0° & Above 55° C)
- ✓ Protect from prolonged direct sunlight using external awnings/internal blind systems or window tinting.

Don't

- ✗ Never use abrasive cleaners, scouring pads, steel wool or scouring powder on your hybrid flooring as they will scratch and dull the finish.
- ✗ Never use soap based detergents which can leave a dull finish on the floor.
- ✗ Never slide or drag furniture items across the floor.
- ✗ Avoid placing heavy objects on floating floors as they can inhibit the natural movement of the floor and cause damage.
- ✗ Avoid wearing spiked heels or sports shoes that may dent and scratch the floor.
- ✗ Steam cleaners are not suitable for hybrid flooring.
- ✗ Never wax, polish, sand or lacquer your hybrid floor.
