Congratulations on the purchase of your National Tiles Floor. To keep your new floor looking great for years to come follow these simple care & maintenance guidelines.

Vinyl Plank Flooring
Cleaning & Care

Cleaning and caring for your National Tiles Vinyl Floor is easy. Simply follow these tips and your floor will stay looking great for years.

**Do**
- ✔ Vacuum, sweep or dust mop the floor to remove any grit or loose dirt which could scratch the floor.
- ✔ Mop the floor using a slightly damp mop and a soap-free, non-abrasive cleaner, removing any marks, footprints or dirt.
- ✔ Stubborn stains and scuff may be removed using a diluted rubbing alcohol.
- ✔ Use non silicon/rubber floor protection under all furniture legs and other heavy objects.
- ✔ The use of exterior doormats at entrances will help protect your floor against excessive dirt, sand, grit, moisture and other substances from shoes.
- ✔ Protect floors from extreme changes in temperature. The ideal environment for a Vinyl floor is between 18° & 25° C.
- ✔ Protect from prolonged direct sunlight using external awnings/internal blind systems or window tinting.

**Don’t**
- ✗ Never use abrasive cleaners, scouring pads, steel wool or scouring powder on your vinyl flooring as they will scratch and dull the finish.
- ✗ Never use soap based detergents which can leave a dull finish on the floor.
- ✗ Never slide or drag furniture items across the floor.
- ✗ Avoid wearing spiked heels or sports shoes that may dent and scratch the floor.
- ✗ Steam cleaners are not suitable for vinyl flooring.
- ✗ Never wax, polish, sand or lacquer your vinyl floor.
